

Agricultural Conference 2024 program

4th December 2024

Small producers and young farmers, ATTENTION!

Are you a smallholder? Or have you started farming recently? Now, you can participate in one of the largest and most prestigious agricultural events of the year, the **Agricultural Conference 2024** in Siófok, between the 4th and the 5th of December, **with a 50% discount.**

Please fill out the following form, and Portfolio's professional team will assess your claim so that you can redeem your discounted ticket.

If you have filled out the form, save it and send it to
kistermeloikedvezmeny@portfolio.hu

The subject of the letter: **Portfolio Agricultural Conference 2024 - smallholder application**

You can access the form by clicking [here](#).

Conference Eve - Professional Programme for the 3rd of December

The participation fee does not include the registration fee for the professional programme on the 3rd of December, nor the dinner on that day. You can register for the programmes on the 3rd of December on the second page of the application.

Regisztráció

Session I: Accelerated Climate Change: What Forecasts Can We Rely On?

Conference Eve - 3rd of December

The section will explore how reliably weather patterns, which fundamentally affect agricultural production, can be forecasted for both the short and long term and what kind of weather can be predicted for 2025. It will also address the extreme weather conditions and new risks that accelerated climate change may bring to the agricultural sector in the coming period. In the discussion, renowned meteorological experts will analyse the factors influencing climate change, the likely trends, and their impacts or consequences on weather patterns in Hungary. The discussion will also cover which Hungarian regions may be the most at risk and where the largest temperature fluctuations or changes in precipitation distribution are expected in the coming years and decades.

What are the chances of another devastating drought next year?
Can we already say with certainty that heat warnings will be issued in 2025?
Will spring frost damage remain an occasional inconvenience, or is it set to become an unavoidable phenomenon?

What are El Niño and La Niña, and what do they have to do with us?
What are the chances of extreme weather events in Hungary in the future?
Can we expect more frequent and significant inland and river floods?
Could the risk of storm and hail damage increase, and is the national hail damage mitigation system functioning effectively?

Moderator: Lajos Braunmüller, Editor, Portfolio

17:00 - 17:45 Roundtable Discussion: Concern for the Fields: What Weather Can We Expect in 2025?

Conversation participants:

Levente Gulyás, Head Of Department, Hungarian State Treasury

Áron Kocsis,

Attila Kovács,

Lajos Németh, Meteorologist, Professional consultant, Karintia Kft.

Session II: Domestic Political Power Dynamics, Economic Outlook: From the Farmers' Perspective

Conference Eve - 3rd of December

Unconventionally, the Agricultural Conference will address the exciting economic policy and domestic political events that could significantly impact the daily operations of agricultural stakeholders in the coming months and years. The section not only reviews the anticipated key changes and economic and internal

policy forecasts but also aims to illuminate and assess the most critical issues from the perspective of agricultural businesses, thus providing answers to how the likely economic and political trends may impact their actual operations. Participants will receive useful background information on the most significant conditions and pitfalls influencing macroeconomic factors, the expected developments in domestic political circumstances, and the opportunities for representing the interests of the agricultural sector within the context of the country's economic and political landscape.

What are the important economic policy developments that the domestic agricultural sector should pay attention to in the coming period?

What international events are most likely to affect domestic economic and political conditions?

How might the domestic political balance of power change between now and the 2026 elections?

How is the political representation and advocacy of agriculture today, and how can it evolve in the next period?

What economic and political processes could be disadvantageous or beneficial for the participants in the agricultural sector?

Moderator: Zoltán Bán, CEO, Net Média (Portfolio Csoport)

17:45 - 18:30 Roundtable Discussion: American Presidential Election, 2026 Parliamentary Elections: What Domestic Political and Economic Events Can Farmers Expect?

Conversation participants:

Zoltán Lakner, Jelen Média

István Madár, Senior Analyst, Portfolio

Session III: EU Membership and Hungarian Agriculture: Failure or Success?

Conference Eve – 3rd of December

Twenty years after joining the European Union, what condition is the Hungarian agricultural economy in? This session reviews the situation of the agricultural sector with the participation of renowned experts. It will discuss how domestic agricultural enterprises can overcome emerging management and market difficulties, what the biggest challenges will be in the coming years, and the direction we are heading in or should be heading. The section also aims to

provide answers regarding the most prominent breakthrough points for the sector and how market players can best leverage the available business opportunities. The comprehensive, interactive discussion will introduce and lay the groundwork for the substantive professional programmes of the Agriculture Conference over the next two days.

What position does the Hungarian agricultural economy hold in the EU agricultural sector?

Is the domestic sector a winner or a loser from joining the EU?

What trajectory is the Hungarian agricultural economy on, and is there a need for a change in direction?

What are the biggest breakthrough opportunities for the agricultural sector in the coming years?

How might the EU and domestic agricultural regulatory environment change?

What are the biggest challenges and threats that Hungarian agricultural stakeholders need to prepare for?

What strategy should agricultural enterprises follow in their business and investment decisions?

Moderator: László Hazafi, agriculture journalist, Portfolio/Agrárszektor

18:30 - 19:15 Twenty Years in the European Union: Is the Hungarian Agricultural Economy a Winner or a Loser? - Breakthrough Opportunities for Domestic Agricultural Enterprises

Conversation participants:

Sándor Font, (Fidesz) elnök, Mezőgazdasági Bizottság (under confirmation)

Dávid Hollósi, President, Board Member, Magyar Bankszövetség agrár munkabizottság

György Raskó, agrárközgazdász,

Masszázs

KIZÁRÓLAG REGISZTRÁLT RÉSZTVEVŐINK SZÁMÁRA ELÉRHETŐ!

A konferencia 1. és 2. napján (december 4-5.) ingyenes masszázst lehetőséget biztosítunk.

A részvétel regisztrációhoz kötött. Helyét kizárólag akkor tudja lefoglalni, ha már rendelkezik belépőjeggyel a rendezvényre. A jelentkezés elfogadásáról értesítést

küldünk. Amennyiben az adott időpont betelt az a jelentkezés során már nem választható.

Időpontok:

1. nap - december 4. 14:00-18:00 között

2. nap - december 5. 9:00-13:00 között

Felhívjuk szíves figyelmüket, hogy vis maior esetén a programváltoztatás- vagy lemondás jogát fenntartjuk.

Registration

Session I: EU CAP: Hopes and Questions

An unprecedented wave of farmer protests erupted at the beginning of the year in the European Union due to dissatisfaction with the Common Agricultural Policy (CAP). Following the recent European Parliament elections, one of the most important questions today is how the CAP might change, whether the green ambitions viewed as excessive will ease, and how the regulatory environment that significantly influences the situation of agricultural stakeholders may develop in the coming period. The section also addresses whether EU expenditures that can be allocated to the CAP will increase or decrease, what the main budgetary priorities might be, and how, in line with these, the short- and long-term support positions of domestic farmers may change.

How might the results of the European Parliament elections affect the EU CAP?

Could the supposedly excessive "green pressure" within the Common Agricultural Policy ease?

What new directions might emerge in EU agricultural regulation?

Could the regulatory environment become more advantageous for farmers?

Will the EU budgetary resources affecting the CAP increase or decrease?

How might the support positions of domestic agricultural sector stakeholders change in the coming years?

Moderator: László Hazafi, agriculture journalist, Portfolio/Agrárszektor

08:00 - 08:05 Opening

Speaker:

Zoltán Bán, CEO, Net Média (Portfolio Csoport)

08:05 - 08:25 The Agricultural Economic Achievements of the Hungarian EU Presidency - The Objectives of Domestic Agriculture in 2025

Speaker:

István Nagy, Agriculture Minister, Ministry of Agriculture

08:25 - 08:45 The Development and Efficiency of Fertiliser Use in Hungary - Comparing Fertiliser Use in Hungary to Western European Countries

Speaker:

László Bige,

08:45 - 09:00 At a Turning Point: How Can the Hungarian Agricultural Economy Become More Competitive?

Speaker:

Csaba Gyuricza, Director, Nemzeti Agrárkutató és Innovációs Központ

09:00 - 09:40 Roundtable Discussion: Massive Farmer Protests, European Parliament Elections in 2024 - What Direction Might the EU's Common Agricultural Policy Take?

Conversation participants:

Tamás Éder, Director for PR and corporate relations, Bonafarm Group

Zsolt Feldman, State Secretary, Ministry of Agriculture

Zsolt Harsányi, Owner-Manager, AXIÁL Kft.

István Jakab, President, MAGOSZ

Zsolt György Papp, Deputy State Secretary, Ministry of Agriculture

Ákos Varga, Chairman of the board, UBM Group

09:40 - 10:30 Roundtable Discussion: Negotiations on Ukraine's EU Accession Begin - What Awaits Domestic Agriculture?

Conversation participants:

Szabolcs Makai, CEO, Talentis Agro Zrt.

Gábor Párkányi, CEO, Mertcontrol Hungary Kft.

Zoltán Reng, CEO, Hungrana

Levente Szabó, CEO, KITE Zrt.

Ákos Szabó, Executive Director, Tranzit Group

Tamás Tarpataki, Deputy State Secretary, Agriculture Ministry

Coffee break

Session II: Mastering Agricultural Finance

Could the macroeconomic environment fundamentally affecting domestic agricultural enterprises become more favourable in the upcoming period, and what are the development prospects for the Hungarian economy? This section will explore these questions and analyse the key factors influencing access to credit and credit conditions. It will discuss how the financing opportunities for agricultural market players may evolve and what preferential loan programmes and support schemes they can access. Financial sector leaders will also share information on the new credit products that banks are offering to their agricultural clients.

How might the domestic macroeconomic environment change in the upcoming period?

How might the conditions for accessing credit and the terms of loans change in the domestic market?

From a financing perspective, how do financial institutions assess their agricultural clients?

What are the key banking requirements for agricultural lending?

How can agricultural sector stakeholders access cheap loans?

What discounted loan programmes and support schemes can agricultural enterprises access?

What loan products and structures have banks and financial institutions developed or are currently developing for the agricultural sector?

Moderator: Zoltán Bán, CEO, Net Média (Portfolio Csoport)

10:50 - 11:00 Ten Crucial Ingredients for the Successful Implementation of the 2024-2027 Investment Programme

Speaker:

Dávid Hollósi, President, Board Member, Magyar Bankszövetség agrár munkabizottság

11:00 - 11:40 Roundtable Discussion: After Difficult Times, Before Stabilisation - Where to Next for the Hungarian Economy?

Conversation participants:

László Krisán, CEO, KAVOSZ Zrt.

Anita Laurinyecz, Director, UniCredit Bank Hungary Zrt.

Balázs Szabó, Deputy CEO, CIB Bank

Róbert Szerdahelyi, Head of SME Business / SME Directorate, Erste Bank

Zsolt Takáts, Director, Raiffeisen Bank

11:40 - 11:50 If Not Us, Then Who? If Not Now, When? - What Will 2025 Bring to the Hungarian Economy?

Speaker:

István Szabó, Executive Director, OTP Bank Corporate and Agricultural Directorate

11:50 - 12:30 Roundtable Discussion: How Can We Access Cheaper Agricultural Loans? - Discounted Loan Programmes, Support Schemes, and New Banking Loan Products for Agricultural Enterprises

Conversation participants:

Zoltán Demeter, Head of Agribusiness Development Department, K&H

András Herczegh, Managing Director, Agrár-Vállalkozási Hitelgarancia Alapítvány

Dávid Hollósi, President , Board Member, Magyar Bankszövetség agrár munkabizottság

István Szabó, Executive Director, OTP Bank Corporate and Agricultural Directorate

Lunch break

Session III/A: Boom in the Feed Industry

The conditions for feeding have significantly improved compared to the past, as evidenced by the increase in feed sales in the domestic market. However, it is essential to consider whether the more favourable trend can be maintained and in what direction the operational conditions of the feed industry may change. The section will explore how the factors influencing the feed market may evolve in 2025, what price trends livestock farmers can expect, what investment

opportunities may arise from rural development resources for the feed industry, and what the latest technologies and formulations are that can help livestock producers improve their feed efficiency. The section also addresses the new challenges posed by artificial and lab-grown meats and the efforts aimed at their regulation, which may impact the market position of livestock farmers and feed manufacturers.

What key trends are likely to characterise the domestic feed market in 2025?

What feed prices can livestock farmers expect next year?

How can feed costs be reduced in the key livestock sectors?

What are the latest technologies and products that livestock farming enterprises can use to make their feeding more efficient?

What threat do lab-grown and artificial meats pose to livestock farming and, indirectly, to the feed industry?

When will lab-grown and artificial meats be banned in Hungary?

13:30 - 13:40 Security as the Key to Progress - Opportunities and Obstacles in Animal Husbandry

Speaker:

Zoltán Kulik, CEO, Vitafort Zrt.

13:40 - 13:50 Eastern Opening: Central Asian Investment in the Feed Industry

Speaker:

Péter Horváth, Board member, UBM

14:00 - 14:30 Roundtable Discussion: Favourable Changes and Dynamic Growth in the Feed Market - Expected Feed Prices, Modern Technologies and Formulations

Moderator: **Zsombor Wagenhoffer**, Director, Hungarian Animal Breeders Association

Conversation participants:

Gergely Balassa,

Zoltán Bene, Manager, Karintia Kft.

Zoltán Kulik, CEO, Vitafort Zrt.

Dániel Szebeni, business development manager, Cargill

Zoltán Zsjak, CEO, Sinte Group

14:30 - 15:00 Roundtable Discussion: Artificial Meats and Lab-Grown Meats: A Threatening Danger in Livestock Farming - Hungarian Responses to Counter Market Expansion

Conversation participants:

Attila Csorbai, Chairman, Baromfi Termék Tanács

Endre Dúl Udó,

Vivien Horváth, expert, MAGOSZ

Session III/B: Precision Farming, Agricultural Digitalisation: Awaiting a Boom

In Hungary, investments in machinery have stalled due to the profitability issues in arable crop production, as these clearly impact farmers' decisions regarding machinery purchases. As a result, there is a particularly important role today for the subsidies that encourage and facilitate agricultural machinery purchases.

The session analyses the current machinery market situation, presents the details of the rural development grant that supports precision farming and outlines the new loan and leasing structures available for machinery purchases.

Additionally, experts will discuss the agricultural economic applications of robotics and the profit-enhancing modern solutions that artificial intelligence and digitalisation techniques can offer to agricultural enterprises.

What price and distribution trends are expected in the domestic agricultural machinery market under the current situation?

How can farmers obtain support from the precision rural development grant?
What new leasing and loan structures can be accessed for agricultural machinery purchases?

In which areas of the agricultural economy can the latest robotic solutions be most effectively applied?

What advantages can the use of artificial intelligence provide to agricultural businesses?

What are the latest digitalisation development trends and opportunities in agriculture?

13:30 - 13:40 Sustainable Soil Conservation Tillage System With a Precision Approach

Speaker:

Zalán Zahorán, Deputy CEO, KITE Zrt.

13:40 - 14:10 Roundtable Discussion: Lost Momentum and Uncertainty in the Agricultural Machinery Market: New Grant Opportunities, Loan and Leasing Alternatives - The Future of Precision Farming and Robotics in Hungarian Agriculture

Moderator: **Viktória Vona**, CEO, owner, Csernozjom Kft.

Conversation participants:

Csaba Bedekovits, Commercial Director, KRAMP Hungary Kft.

Gábor Berényi, director of productive assets financing, Merkantil Bank Zrt.

Zoltán Illés, CEO, Agrotec

Péter Ákos Mesterházi, Team leader, Axiál Kft.

Zalán Zahorán, Deputy CEO, KITE Zrt.

14:10 - 14:25 Integration of Robots, IoT, and Artificial Intelligence

Speaker:

László Kóté, Deputy Chief Operating and Marketing Officer, Delta Systems Kft.

14:25 - 15:00 Roundtable Discussion: Applications of Artificial Intelligence in Agriculture - Profit Enhancement with the Most Advanced Digitalisation Solutions

Moderator: **Péter Miklós Varga**, Permanent Expert, Cibus Hungaricus Foundation

Conversation participants:

László Kóté, Deputy Chief Operating and Marketing Officer, Delta Systems Kft.

László Stündl, dean, Debrecen University

Levente Szabó, director of projects / Business Solution Directorate, 4iG

Csaba Udvarhelyi,

Session III/C: Energy Use, Fertilisation: The Goal is Efficiency

In today's uncertain and cost-increasing energy market, it is becoming increasingly important for agricultural businesses to improve the efficiency of their energy use. The section will review the expected energy market trends and explore the opportunities for industry players to enhance their energy efficiency. There will be a discussion on the available grants and funding opportunities for these purposes, as well as the renewable energy sources that agricultural businesses can rely on and the efficiency-enhancing renewable energy developments they can implement. The other topic of the section will focus on how producers can improve the efficiency of their fertiliser use. Experts will

analyse the fertiliser market processes and provide a forecast of how fertiliser prices may develop in the domestic market in the coming period.

What supply and pricing conditions can be expected in the energy markets?

What funding opportunities are available for agricultural businesses to improve their energy use efficiency?

What could be the most effective renewable energy developments in agriculture?

What factors could influence the domestic fertiliser market in the upcoming period?

How might fertiliser prices evolve in 2025?

What new products and technologies can farmers use to enhance the efficiency of their fertiliser use?

13:00 - 13:15 Locally Producible Green Energy - the Self-Sufficiency Opportunities of Hungarian Agriculture

Speaker:

Róbert Fehér, CEO, 8G Energy

13:15 - 14:00 Roundtable Discussion: Energy Efficiency Improvement Investments in Agriculture - Renewable Energy Developments and Funding Opportunities, Energy Market Trends in 2025

Moderator: **Attila Weinhardt**, Senior Analyst, Portfolio

Conversation participants:

Péter Ábrahám, IT, integration and sourcing director, Bonafarm Zrt.

Gábor Bali, Managing Director, ENERGIQ

Róbert Fehér, CEO, 8G Energy

Csaba Novák, President, Hungarian Renewable Energy Association

14:00 - 15:00 Roundtable Discussion: Declining Prices, Increasing Purchases in the Fertiliser Market: What Can Farmers Expect Next Year? - Market Factors Influencing Fertiliser Prices

Moderator: **Lajos Braunmüller**, Editor, Portfolio

Conversation participants:

Ferenc Czina, CEO, Agrolink Zrt.

Ferenc Isztin, CEO, Dombegyházi Agrár Zrt.

Zoltán Rácz, Acting Manager, IKR Agrár

Csaba Varga,

Session III/D: The Food Industry in a Strategic Role

The food industry plays a prominent role in Hungary and is now considered a distinguished sector from the perspectives of food security, sovereignty, and strategic importance. The session provides a detailed analysis of the investment opportunities for food industry enterprises, with a particular focus on grant support available through rural development programmes. Additionally, the experts will address the industry's competitiveness strategy, the experiences regarding regulatory changes affecting food packaging, as well as future modification proposals and modern, innovative packaging solutions.

What are the key elements of the competitiveness strategy for the food industry?

Which businesses can become national champions, and what advantages can they enjoy?

How can businesses in the food industry successfully apply for rural development grants?

What are the most promising development directions for the domestic food industry?

What are the key experiences regarding regulatory changes related to food packaging, and what further modifications can be expected?

What innovative packaging solutions can food industry businesses implement?

13:00 - 13:10 Digitalisation and SAP in the Agricultural Sector

Speaker:

Donát Szúcs,

13:10 - 14:00 Roundtable Discussion: Support and Development Boom in the Food Industry: Requirements for Successful Applications, New Opportunities in 2025 - The Industry's Competitiveness Strategy

Moderator: **László Friedrich**, university professor, institute director, Hungarian University of Agriculture and Life Sciences

Conversation participants:

Tamás Éder, President, Federation of Hungarian Food Industries

Ádám Nagy, CEO, Nádudvari Élelmiszer Kft.

Márton Nobilis, State Secretary, Agricultural Ministry

János Ruck, CEO, Gallicoop

Ákos Szabó, Executive Director, Tranzit Group

Attila Sztankó, CFO, Kométa 99 Zrt.

14:00 - 15:00 Roundtable Discussion: Criteria for Sustainable Food Packaging: Domestic Regulatory Experiences and Upcoming Changes - Modern Packaging Solutions and Innovative Products

Moderator: **Attila Kiss**, Assistant Professor, University of Debrecen

Speakers:

Gábor Arató, Executive Director, Manupackaging Hungary

Miklós Nagy, General Secretary, Hungarian Packaging Association

Tivadar Runtág, COO, MOHU MOL (To be confirmed)

Szilvia Szőke, Sales Director, LC Packaging

Session III/E: Horticulture of the Future: Focusing on Developments

Today, one of the biggest challenges for domestic horticulture is how to effectively utilise the support opportunities offered by newly available rural development grants. The main focus of the section is on the opportunities that may arise for the development of greenhouses, polytunnels, cold storage facilities, and plantations within the sector. It will highlight the most significant investment intentions and discuss which market players may successfully apply for grants based on previous experiences. The session will also address the sector's fight against climate change, which is also affecting horticulture, including issues such as varietal conversion and the use of modern technologies.

What are the most urgent development requirements of the domestic horticultural sector?

Who can successfully apply for the support of rural development grants?

Based on previous grant application experiences, what are the most popular development objectives in the Hungarian horticultural sector?

What tools can producers use to combat the adverse effects of climate change?

Which crops require varietal changes for modern vegetable and fruit production?

Which fruit plantations and vegetable crops should be prioritised for development in the future, and in which areas is it advisable to discontinue production?

Moderator: Ferenc Ledó, Chairman, FruitVeB

14:00 - 14:10 The necessary directions for the development of the fruit and vegetable sector

Speaker:

Ferenc Apáti, President, FruitVeB

14:10 - 15:00 Roundtable Discussion: Greenhouses, Polytunnels, Cold Storage Facilities, and Plantations: Who Can Benefit From the New Horticultural Grants? - Combating Climate Change Through Developments and Varietal Changes

Conversation participants:

Ferenc Apáti, President, FruitVeB

Imre Csizmadi, owner, Csizmadi Farm

Viktor Losó, Director, Mirelite Mirsa

Márk Sira, Head of Horticulture Division, KITE Zrt.

Lóránt Szajkó, CEO, Kisalföldi Mezőgazdasági Zrt.

Coffee break

Session IV/A: A Turning Point in Animal Husbandry

After a series of crises in recent years, the pressure on domestic livestock farms has eased, and output has increased in the main livestock sectors. The session will outline what farming conditions will be like next year in the main product sectors, primarily cattle, pig, poultry and sheep, what profitability producers can expect, and what development and animal health challenges and support opportunities they should be prepared for. In this section, the Portfolio Group will host the Dairy Forum, which will focus on whether the domestic dairy sector is set for a more sustained recovery after the recent series of crises and what further support and stabilisation regulatory measures are needed.

What cost and profitability conditions can farmers expect next year in the key livestock sectors?

What new development and other support options can livestock farmers access?

How might the animal health requirements change, and what support can be utilised for prevention?

How might the profitability situation of the dairy sector develop in the coming years?

What developments are needed in milk production and the dairy industry to enhance competitiveness?

How might milk purchase prices and market processes affecting the dairy sector evolve in the coming years?

What measures can be taken to combat the increasing threat of imports in the domestic milk market?

Moderator: Zoltán Fórián, leading agricultural expert, Agricultural Competence Centre, Erste Bank Zrt.

15:20 - 15:30 Consumption Trends in the Pork Market

Speaker:

Tibor Ábrahám,

15:30 - 15:40 Biotechnological Solutions to the Challenges in Animal Husbandry

Speaker:

László Bustyaházai, Feed Business Unit Manager, Member of the Board of Directors, UBM Feed Kft.

15:40 - 16:20 Roundtable Discussion: A Positive Turn in Domestic Animal Husbandry - Cost Trends and Market Prospects for 2025, New Support Opportunities, and Animal Health Measures

Conversation participants:

Gábor Bakó,

László Búza, commercial director, Topigs Norsvin Central Europe

Szabolcs Németh, CEO, Bábolna TETRA Baromfitenyésztő és Forgalmazó Kft.

Szabolcs Pásztor, Head of the Office of the Chief Veterinary Officer, Ministry of Agriculture

Éva Sánta,

16:20 - 16:30 Milk at Its Best: Is Quality Enough, or Is Added Value Needed Too?

Speaker:

Attila Kiss, Assistant Professor, University of Debrecen

16:30 - 17:00 Roundtable Discussion: Portfolio Dairy Forum - 2nd Edition: Encouraging Signs After a Series of Crises? - The Future of the Dairy Sector in Hungary

Conversation participants:

Zoltán Harcz, CEO, Milk Interbranch Organization and Dairy Board

Titus Kuk, , Sole-Mizo Zrt.

Zoltán Kulik, CEO, Vitafort Zrt.

Ilona Zséli, Procurement Manager, Reál Élelmiszer Kft.

Session IV/B: Drones in Agriculture: Promising Possibilities

The potential applications of drones in Hungarian agriculture are becoming increasingly promising; therefore, it is now essential for farmers to be aware of the legal regulations, technical requirements, and economic conditions surrounding drone use. The session will explore the latest regulatory requirements for the use of drones in agriculture, what types of drones are available to farmers, and the areas of farming where businesses can use drones effectively. The discussion will also cover when to decide to buy a drone and the cost and return/profitability ratios of drone investments.

What are the basic agricultural conditions for legal drone use?

How is the domestic drone pilot training system structured?

What new regulations, for example on crop protection, could facilitate the use of drones in agriculture?

Which agricultural activities are worth using drones for?

What cost structures and profitability indicators characterise the use of drones?

What types of drones are suitable for agriculture, and for what purposes should they be used?

Moderator: Máté Keczer, Deputy Managing Director, ABZ Drone Kft.

15:20 - 15:35 This Is How Spraying Drones Are Transforming Europe's Agriculture - Key Insights From 2024

Speaker:

Károly Ludvigh, CEO, ABZ Innovation

15:35 - 17:00 Roundtable Discussion: Agricultural Alternatives for Legal Drone Use - Drone Types, Applications, Regulatory Requirements and Economic Considerations

Conversation participants:

Erik Czinege, plant nutrition innovation manager, Kwizda Agro Hungary Kft.

István Rikk, , Drone2B

Balázs Szauer, CEO, Cloud for Intelligent Airplace Zrt.

Edit Tóthné Lippai,

Zsombor Vejtey, , ABZ Innovation

Session IV/C: A Reform in the Seed Sector, New Challenges in Crop Protection

How to protect their crops in the face of increasingly extreme weather conditions has become one of the most important issues for domestic farms. The experts will focus on presenting new pesticides and their application technologies, as well as biological pest control solutions that enhance the effectiveness of pest management. They will also discuss the risks associated with the use of illegal or counterfeit pesticides. Another key topic of the section will be the reform proposals aimed at transforming seed multiplication and distribution within the European Union. Additionally, there will be discussions on what seed prices and variety availability farmers can expect in 2025.

How can farmers protect their crops amid increasingly extreme weather conditions?

What new plant protection products are available for effective crop protection?

What are the main directions of biological plant protection developments?

What risks are associated with the use of counterfeit and illegal plant protection products?

What regulatory reform is in store for EU seed propagation and distribution?

How can farmers mitigate the adverse effects of climate change on seed use?

What variety offerings and price conditions are expected next year in the domestic seed market?

15:20 - 15:30 Climate Change, EU Expectations, Market Uncertainties:

What Is Next For Plant Protection?

Speaker:

Róbert Görög, Managing Director, Hungarian Crop Protection Association

15:30 - 16:10 Roundtable Discussion: How Can We Protect Our Crops Under Extreme Weather Conditions? - New Plant Protection Products and Biological Solutions, Combating Counterfeit and Illegal Products

Moderator: **Róbert Görög**, Managing Director, Hungarian Crop Protection Association

Conversation participants:

Tibor Dobai, kereskedelmi igazgató, Syngenta

Gábor Göröcsös, District Sales Manager, Bayer Hungária

László Hörömpő, Commercial Manager, Nufarm Hungária Kft.

16:10 - 16:20 Changes in EU Regulations on Seeds and Propagation

Materials

Speaker:

Gábor Polgár, Executive director, Hungarian Seed Association and Product Council

16:20 - 17:00 Roundtable Discussion: EU Regulatory Reform in Seed Propagation and Distribution - Hungarian Seed Prices and Varietal Offerings in 2025

Moderator: **Gábor Polgár**, Executive director, Hungarian Seed Association and Product Council

Conversation participants:

Bence Józsa,

Réka Lakatos, Product Manager, Bayer Crop Science

Anna Seiwert, Owner-CEO, Lajtamag Kft.

Imre Sík, Country Manager, RAGT Vetőmag Kft.

Tamás Tóth,

Session IV/D: Food Market, Agricultural Marketing, Export Development

Can domestic food consumption enter a sustained growth trajectory, and how are the sales opportunities in the food industry expected to evolve in the coming period? This section focuses on these topics, aiming to provide a forecast for industry enterprises to enhance their planning capabilities. The participants in the discussion will address the marketing tools and strategies that food industry businesses can employ to achieve success in both domestic and international markets. There will also be a discussion on the main ways to increase domestic agricultural exports and what financing and support solutions can be used by the industry to develop exports.

What consumption trends are likely to emerge in the domestic food market?
How can food industry businesses strengthen their positions in the domestic market?

What types of support and funding can be accessed in community agrarian marketing?

In which areas is there potential for increasing Hungarian agricultural exports?
What financing and support structures can assist in the development of food industry exports?

15:20 - 16:00 Roundtable Discussion: How Can We Become Successful Suppliers? - Experiences of an International Corporation and Hungarian Agricultural Market Participants

Moderator: **Lajos Braunmüller**, Editor, Portfolio

Conversation participants:

Gábor Császár, Managing Director, Mezőker Kft.

Tibor Cselényi, Senior Head of Quality Systems & Product Development, Progress Restaurant Chain Ltd.

Zoltán Gazsi, CEO, Eisberg Hungary Kft.

16:00 - 16:15 The Past, Future, and Significance of the Székely Product Trademark System in the Food Market

Speaker:

István Becze, Chairman, Székely Gazdaszervezetek Egyesülete

16:15 - 17:00 Roundtable Discussion: Anticipated Turning Point and Growth Prospects in the Domestic Food Market: Marketing Tools for Successful Market Entry, Key Directions for Export Development, and Financing Options

Moderator: **Attila Vörös**, Managing Director, Felelős Élelmiszergyártók Szövetsége

Conversation participants:

Zoltán Boros,

Beáta Felkai, Deputy State Secretary, Agricultural Ministry

Gergely Giczi, Deputy General Manager, Agricultural Marketing Centre

Session IV/E: Irrigation as a Means to Combat Severe Drought Damage

By the end of summer, agricultural producers had reported drought damage on nearly 400,000 hectares, further underscoring the urgent necessity for accelerated irrigation development in Hungary once again this year. The session will highlight where opportunities for irrigation investments may arise, the costs that producers may face, and the potential support they can obtain through new rural development grant opportunities. The session will also address how banks can complement the new grant support with various irrigation loans, as well as what administrative investment and other fee support measures agricultural enterprises can expect as additional facilitation.

Where is the necessary state infrastructure for irrigation development currently available or expected to be established in the near future?

What new irrigation development rural development grants can agricultural producers apply for?

What irrigation loan schemes are banks developing for investments?

What costs should farmers anticipate for irrigation developments?

Which crops should be irrigated, and when can the investments be expected to pay off?

What administrative simplifications and fee subsidies can farmers expect in irrigation development and water usage?

What are the most advanced irrigation solutions for various field crops?

The New Irrigation Rights: What Should Be Known About This Opportunity, and How Can It Benefit Investing Farmers?

Moderator: Csaba Bozán, Head of Research Centre, MATE KÖTI Öntözési és Vízgazdálkodási Kutatóközpont

15:20 - 15:40 Major Legislative Changes: New Regulations in Irrigated Farming and Water Management

Speaker:

Tamás Andréka, Department head, Ministry of Agriculture

15:40 - 16:00 Support for Irrigation Development Investments in the CAP Strategic Plan

Speaker:

László Polai,

16:00 - 17:00 Roundtable Discussion: New Irrigation Development Grant in the Fight Against Drought: How Can We Access Funding and Bank Loans for Irrigation-Based Farming? - The Creation and Significance of Irrigation Rights

Conversation participants:

Enikő Becsákné Tornay,

Zoltán Demeter, Head of Agribusiness Development Department, K&H

László Polai,

Tamás Szigeti,

István Zimmermann, Head of Division, Talentis Agro

Session V: Harsh Climate Change: What Should We Cultivate on Hungarian Soils?

Due to drastic declines in weather and market conditions, the profitability of arable crop production has worsened significantly. These negative trends appear to be so severe that they may necessitate a substantial change in the previously established sowing structure. The section explores what could be cultivated instead of the long-dominant crops, primarily wheat, corn, and sunflowers, and how farmers might partially replace these crops with alternative plants. Experts also analyse how competitive farm sizes are changing in Hungary due to economic, market, and weather impacts, as well as the opportunities and tools available to farmers to survive in the rapidly changing agricultural landscape with their cultivated areas.

How is climate change affecting the crop structure in Hungary?

In which regions can we expect further drastic climatic impacts to occur?

What crops can farmers plant instead of the traditionally cultivated, extensive arable crops?

How do changing agricultural conditions affect the competitive farm size in Hungary?

In the long term, what size of agricultural operations will be able to survive in the intensifying market competition?

Moderator: Gergő Soltész, Owner, Ostorosbor Pincészet Zrt.

17:00 - 17:10 The Hungarian State Treasury's 2024 Subsidy Payments - 2025 Payment Plans and Farmer-Friendly Developments

Speaker:

Miklós Detre, Vice President, Hungarian State Treasury

17:10 - 17:20 This Year, Soybean Planting Area Reached a Historical Record - Why Now, and What Does the Future Hold?

Speaker:

Zoltán Bene, Manager, Karintia Kft.

**17:20 - 18:00 Roundtable Discussion: Climate Change Disrupts Everything:
What Should Be Grown on Hungarian Arable Land? - New
Criteria for Structural Change and Competitive Farm Size**

Conversation participants:

Sándor Farkas, Deputy Minister, Ministry of Agriculture

ifj. Miklós Fazekas,

Csaba Gyuricza, Director, Nemzeti Agrárkutatási és Innovációs Központ

Herman Kovács, CEO, NAGISZ

József Vida, President, Opus Global Nyrt.

Award ceremony

This year, we recognise the most outstanding Hungarian performances in 9 categories!

Portfolio Group will acknowledge the most successful and remarkable agribusiness actors once again at one of the most important agricultural events of the year, the **2024 Agricultural Conference**. The winners will be selected by a prestigious jury who will reward the following categories:

Woman Agripreneur of the Year,

Young Agripreneur of the Year,

Horticulturist of the Year,

Livestock Producer of the Year,

Crop Producer of the Year,

Agricultural Innovation of the Year,

the winner of the Award for Sustainable Agriculture,

Agricultural Investment of the Year,

the Portfolio Award for Agribusiness.

Standing reception, evening programmes

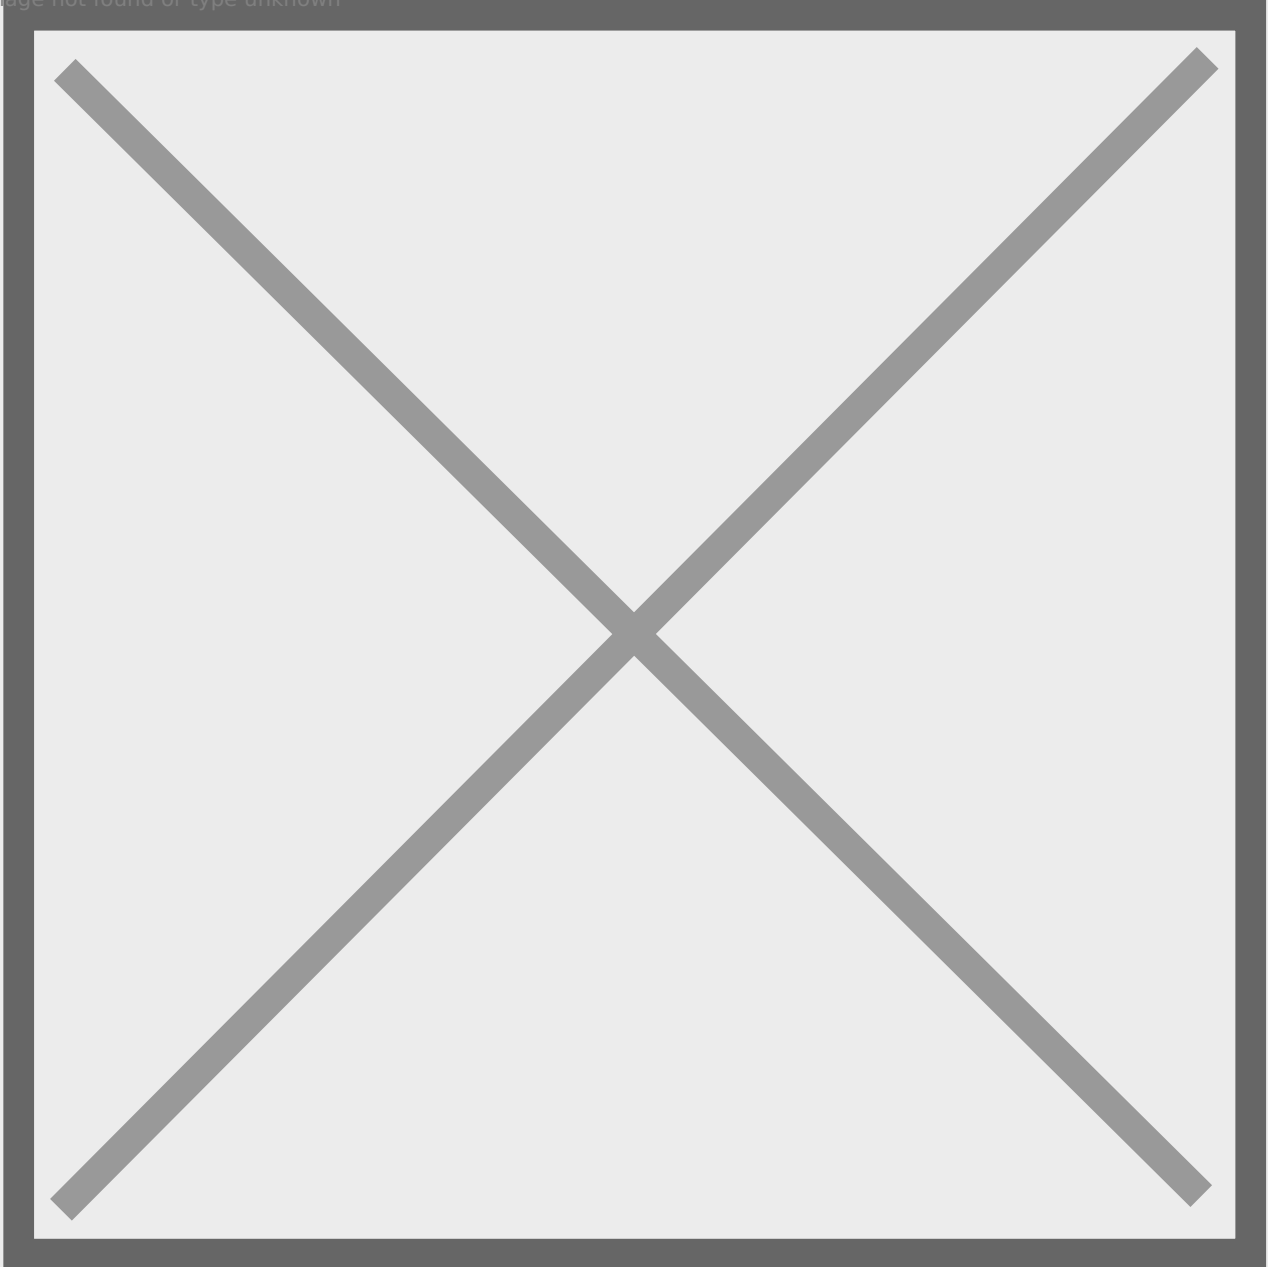

After the awards ceremony, everything will be given for our participants to discuss the most exciting professional issues and create new partnerships and business links or tend to the existing ones in a relaxed atmosphere.

We provide various programmes for your evening entertainment, as usual:

- Participate in a **Casino Party** with your colleagues
 - Roll a ball in the hotel **bowling** alley
- This year, we also considered lovers of **quality beers, wines, champagnes, brandies and gins.**

- Stay with us until the end of the event for a **stuffed cabbage to close the evening at midnight.**

Session I: Sustainable Tillage, Much-Anticipated New Green Grants

Sustainability expectations are becoming increasingly important in EU agriculture, making it essential for producers to understand how EU regulations regarding sustainability are evolving, what obligations they impose on farming practices, and how these regulations will impact agricultural businesses. The section reviews the legal framework surrounding agricultural sustainability, including the recently adopted EU Nature Restoration Law and expected changes to the requirements, and analyses whether further regulatory ambitions could have a production-reducing effect on Hungarian agriculture. Experts will present the advantages, criteria, and opportunities for regenerative soil management in Hungary and in this context, they will also discuss the long-term business opportunities that carbon credit trading may offer to agricultural producers. There will also be a discussion on which farmers can participate in the long-awaited new agri-environmental and organic farming programme starting next year and what level of funding they can expect from these grants from 2025 onwards.

How do the EU's sustainability efforts impact Hungarian agriculture?

What obligations might the recently adopted Nature Restoration Law impose on producers?

How might the EU regulations concerning sustainability change in the upcoming period?

Could the sustainability regulations lead to significant production reductions in Hungarian agriculture?

What are the criteria and advantages of regenerative soil management?

What soil-friendly technologies can farmers use in Hungary, and what input materials/products assist in sustainable soil management?

What long-term business advantages could the trading of carbon dioxide quotas provide for agricultural producers?

Who can benefit from the re-launched agri-environment and organic farming grants, and what amount of support can farmers expect to receive starting next year?

Moderator: László Hazafi, agriculture journalist, Portfolio/Agrárszektor

08:45 - 09:10 The Effects of Climate Change and Adaptation Possibilities in Agriculture

Speaker:

János Áder,

09:10 - 09:25 ESG in the Food Industry - a New Approach From a Health, Sustainability, and Governance Perspective

Speakers:

Attila Sztankó, CFO, Kométa 99 Zrt.

Péter Vörös, Director General, MATE Kaposvári Campus

09:25 - 10:00 Does Production Need To Be Reduced on Hungarian Farmland Due to the EU's Sustainability Goals? - The Advantages of Regenerative Soil Management, a Smaller Carbon Footprint, and the Agricultural Business Opportunities of Carbon Quota Trading

Moderator: **Dávid Mezei,** Head of Unit, MBH Bank

Conversation participants:

Szabolcs Bóna, Chairman of the Board, Rábapordányi Mezőgazdasági Zrt.

Dóra Drexler, Managing Director, Ökológiai Mezőgazdasági Kutatóintézet

Márton Hajdu,

Attila Szabó, President, TMG - Association of Soil Renewal Farmers

Nikoletta Szanka, Commercial manager, Indigo Agriculture Hungary

10:00 - 10:30 Roundtable Discussion: The New Agri-Environmental Management and Organic Farming Grants Are Coming: Who Can Receive Support and Under What Conditions From 2025?

Moderator: **Dávid Mezei,** Head of Unit, MBH Bank

Conversation participants:

Károly Göbölös, CEO, Gömbi Agro Kft.

Attila Kondor,

Péter Roszík, delegált képviselő, (előadó személye egyeztetés alatt)

Eszter Salamonné Ebele, Head of Department, Hungarian State Treasury

Coffe break

Session II/A: EU Regulations Outside of the CAP: How Can Hungarian Agriculture Benefit?

While the farming conditions for agricultural sector players are fundamentally shaped by the EU's Common Agricultural Policy (CAP), it is becoming increasingly important to pay attention to regulatory areas that are not part of the CAP but can significantly influence the operational scope and opportunities within the agricultural economy. The session will examine the potential impact of EU regulations outside the Common Agricultural Policy on agricultural production. It will also discuss the additional sources that domestic agricultural market participants can apply for beyond the CAP, as well as the purposes for which the awarded funding can be utilised. The discussion will focus on how agricultural businesses can access additional EU funding beyond the CAP and the most effective ways to utilise these funds to enhance their competitiveness.

What impact could EU regulation outside the CAP have on domestic agricultural production?

What support can Hungarian agricultural businesses apply for outside the Common Agricultural Policy?

How can farmers access additional funding beyond the amounts available through the CAP?

In which farming areas can funds from outside the CAP be used?

How can the available funding improve the competitiveness of Hungarian agriculture?

Moderator: István Bognár, Senior Business Development Manager, MBH Bank

10:50 - 11:50 Roundtable Discussion: The Impact of EU Regulations Beyond the Common Agricultural Policy on Agricultural Production - Funding and Application Opportunities Outside of the CAP

Conversation participants:

Dániel Bene, Advisory, Magyar Fejlesztésösztönző Iroda

Árpád Cilip, Chairman, Hargita Megyei Fejlesztési Ügynökség

Tamás Józsa, Head of Office, Veszprém MJV Polgármesteri Hivatal

Gergely Papp, Deputy Director General, Hungarian Chamber of Agriculture

Orsolya Somogyi-Frizon, Deputy Head of Unit, European Commission

Session II/B: Rapid Innovation in the Agricultural Sector

Domestic agricultural market participants must stay up-to-date with the latest agricultural innovations that can significantly enhance the effectiveness of their economic activities. Adopting and applying new products and farming management practices can guarantee that agricultural enterprises operate more efficiently and competitively in line with modern requirements. The session will feature ten-minute presentations on outstanding and exemplary agricultural innovation developments in Hungary.

Moderator: Kata Tóth, Conference project leader, Portfolio

10:50 - 11:00 The Activities and Agricultural Innovation Efforts of the Hungarian Association for Innovation

The presentation is about the goals of the Hungarian Association for Innovation (MISZ) and the strengthening of the role of innovation in stimulating the economy. The speaker will report on the latest Hungarian Innovation Grand Prize competition, which annually recognises the most significant domestic innovations, including agricultural innovations. In addition, the speaker will discuss the National Science and Innovation Olympiad, a talent-scouting competition with a 34-year history in the STEM fields, which supports participating students with mentoring, scholarships, and international opportunities. There will be a discussion on the role of the renewed regional directorates, the benefits of membership, the services offered by the Hungarian Innovation Association (MISZ), and the planned collaboration between MISZ and the Ministry of Agriculture.

Speaker:

Csaba Bóthe, Managing Director, Magyar Innovációs Szövetség

11:00 - 11:10 Smart Farm - The Automated Facility

The presentation will demonstrate how to transition cost-effectively to data-driven farming, as well as how to overcome labour shortages and manage energy costs. The information presented will support the idea that building an efficiently operating agricultural facility is no longer as difficult as it once was.

Speaker:

József Kövesdi, Managing Director, Okosfarm

11:10 - 11:20 Data-driven Future in the Agricultural Sector: How is AI Shaping Decision-Making?

The agricultural sector holds vast amounts of information, but this wealth of data alone does not guarantee a competitive advantage. The real value lies in effective analysis and fast, fact-based decision-making. The presentation aims to demonstrate how artificial intelligence (AI) can become the most significant strategic tool in agricultural decision-making.

Speaker:

Benedek Késmárki, Managing Director, BlueBAX Solutions Kft.

11:20 - 11:30 Successfully Without Gluten - One of the Most Innovative Market Niches in the Food Industry

The gluten-free market, shedding its childhood ailments, is slowly entering adulthood. Initially, when we thought of a product being gluten-free, it was mainly consumers suffering from certain diseases that came to mind. Currently, this category is increasingly targeting consumers who do not have any illness but have a demand for a healthy lifestyle. The latest versions of gluten-free products are, in fact, one of the most innovative parts of the food industry. In addition to innovative gluten-free pasta and extruded products, the biggest technological challenge lies in the development of gluten-free bakery goods. In order to create tasty and nutritionally modern products, it is essential to present more advanced ingredients, technologies, and the latest innovations compared to previous ones.

Speaker:

Péter Szabolcs,

11:30 - 11:40 Nanobubble Technology for the Agriculture of the Future: Significant Yield Increase, Shorter Production Cycles, Extended Shelf Life

The presentation is about a real, marketable, and sustainable technological innovation. In our world, where sustainable farming practices are no longer an option but a necessity, nanobubble technology offers new opportunities for agricultural producers who use irrigation. This innovative, chemical-free solution improves soil and plant health, enhancing their stress resistance. It adaptively alters the water absorption capacity of plants, increases biomass volume, and promotes and supports higher yields - all while reducing dependence on chemicals.

Speaker:

Tamás Schneider, managing owner, Greenwave Technology Kft.

Session III/A: A Hectic Cereals Market: What Does the Future Hold?

What to expect in the cereals market remains a major puzzle for domestic farmers. It is not only extreme weather conditions that cause problems for farmers but also opaque and unpredictable market processes. The session will focus on providing producers with a forecast of the factors affecting the cereals market and the prices and outlets expected in 2025. There will also be a discussion on how farmers can protect themselves against risks in the cereals market and which varieties and technologies they should switch to in order to reduce their exposure to weather and market anomalies. The discussion will also cover the quality requirements of buyers in the cereals sector and the new market opportunities for the production and sales of premium wheat.

What factors could determine the trends in the cereals market in 2025?

How can buying prices develop in the cereals market?

What costs can farmers expect next year, and how will the profitability of the main crops such as wheat and maize change?

How long should producers store their cereal stocks and when should they enter the market?

How can the weather and market risks of cereal production be reduced?

How can we achieve better prices on the market and what varieties and cultivation technologies can be used to meet quality market demands?

What opportunities can premium quality wheat offer in today's market and farming conditions?

Moderator: Lajos Braunmüller, Editor, Portfolio

11:50 - 12:05 The Most Important Updates on Land Regulation - Changes in the Electronic Land Registry

Speaker:

Tamás Andréka, Department head, Ministry of Agriculture

12:05 - 12:50 Roundtable Discussion: Uncertainty and Unpredictability in the Cereals Market: What Prices Can We Expect in 2025? - Quality Requirements and Premium Wheat, Contracting and Sales Strategies

Conversation participants:

Szabolcs Baranyi,

Zoltán Bene, Manager, Karintia Kft.

Gábor Berkes, Chairman-CEO, Cargill Magyarország Zrt.

Zoltán Lakatos, CEO, Hajdú Gabona Zrt.

Zoltán Reng, CEO, Hungrana

Session III/B: Global Trends in Agricultural Innovation - What Should Hungarian Producers Do?

What are the main trends that are shaping innovation in the world of agribusiness today? This is the focus of this session, which aims to provide domestic agribusiness actors with a reference point on the technological innovations that could soon become part of everyday farming. Farm businesses must be aware of the potential of innovative products and how they can be introduced into their own farming practices as soon as possible. It may become an existential issue for the Hungarian agricultural sector to react quickly and flexibly to accelerating innovation trends, as this is the only way for the participants in the sector to maintain and improve their competitiveness in domestic and foreign markets.

What are the main innovation trends in agriculture worldwide?

What are the innovation trends in crop and livestock production?

What are the most significant recent innovation achievements that Hungarian farmers should pay attention to?

How can domestic agricultural enterprises learn about innovative products and technologies most quickly?

What do the actors in the agricultural sector need to do to successfully adopt international and domestic innovation results?

Moderator: Tibor Czigány,

11:50 - 12:50 Roundtable Discussion: Main Directions of Agricultural Innovation in Hungary and in the World - How Can Hungarian Agricultural Enterprises Discover and Apply Innovative Results?

Conversation participants:

Zoltán Balla, Director, Marton Genetics-Elitmag Kft.

Attila Hajdú,

Balázs Holán, Innovation Project Manager, Hungarian Chamber of Agriculture

István Molnár, CEO, Agrár Béta Kft.

István Oláh, Corporate Services Director, Nemzeti Innovációs Ügynökség

Lunch break

Session IV/A: Rural Development Tender Dumping: Useful Experiences and New Calls for Proposals

There has been a surge in tenders this year for new rural development support for agricultural operators. The session will summarise the experience of the new calls so far, who can win, and the most important aspects of evaluation, implementation, and grant payments. The experts also outline the Ministry of Agriculture's further plans for rural development funds and in which sectoral areas new tenders may appear in 2025 and beyond.

What are the main lessons from this year's rural development tenders?

What criteria are used to evaluate applications and who can win?

What are the main criteria for implementing and monitoring tenders?

When can operators in the sector access the aid they have been awarded?

What other rural development proposals could emerge in 2025?

Moderator: Gergely Papp, Deputy Director General, Hungarian Chamber of Agriculture

14:05 - 14:50 Roundtable Discussion: This Year's Experience of New Rural Development Tenders - Main Criteria for Evaluation, Implementation and Payment of Support - Further Opportunities for Applications in the Coming Years

Conversation participants:

Balázs Garamvölgyi, Head of Factoring, Hungarian Bankholding

Ildikó Nagyné Legény, President, MAGOSZ

Endre Szabó, , Magyar Államkincstár

Szabolcs Szigeti,

Sándor Tóth, Deputy Chief Economic Officer, Nagisz Zrt.

Session IV/B: Sunflowers, Rapeseed: What Will It Take To Succeed in 2025?

This year, for the first time, the Agriculture Conference will take a detailed look at the most important aspects of oilseed production, in particular sunflower and rapeseed. The session will look at what farmers should consider concerning these crops and which varieties can reduce weather risks and are most in demand on the market. The experts analyse market trends and buying and selling opportunities for sunflower and rapeseed and also look at what prices farmers can expect in 2025. This will also include a discussion on the expected cost situation so that it can be seen what prices and average yields will make production profitable next year.

What aspects of sunflower and rapeseed production should producers consider?

Which varieties can reduce weather and plant health risks?

What is the importance of species selection in competitive sunflower and rapeseed production?

What sunflower and rapeseed prices can we expect in 2025?

What costs can producers expect to pay and what yield averages can they achieve with sunflower and rapeseed?

Moderator: Viktor Balázs, Vice President, Hungarian Chamber of Agriculture

13:50 - 14:00 Precision Sunflower Farming in Crop Rotation

Speaker:

János Nagy,

14:00 - 14:50 Roundtable Discussion: Will Sunflower and Rapeseed Be a Success? - Prospects for Domestic Farmers' Profitability in 2025

Speakers:

Gyula Gáspár, owner, Agropoint Kft.

János Nagy,

Tamás Pint,

Norbert Potori, Research Director, Agrárközgazdasági Intézet

Tamás Tóth,

Session V: Producer Protection Legislative Package: Tightening Up From January

Earlier this year, Parliament adopted a package of producer protection legislation, many of whose provisions will enter into force from January 2025. The declared aim of the legislative changes is to give farmers faster access to the value of their goods and a better contractual position. The session summarises how farmers, buyers and traders will be affected by the new legislation, who may benefit from the package, and in which cases market players may face penalties. The discussion will also cover, among other things, payment deadlines, non-payment penalties, compulsory risk-sharing, contract grower cooperation, and cases of occupational disqualification.

What are the most important elements of the producer protection package?

What provisions will apply to market operators from 2025?

What payment deadlines do buyers have to meet and in which cases can they expect penalties?

How should the provisions on mandatory risk-sharing and contract grower cooperation be interpreted?

In what cases can an occupational disqualification be used as a sanction?

Overall, what benefits could the package bring to farmers?

Moderator: Gyöngyi Kürthy, Deputy Head of the Directorate, Institute for Agricultural Economics

14:50 - 15:05 Producer Protection Legal Amendments: What Steps Have Been Taken for the Benefit of Farmers?

Speaker:

Tamás Andréka, Department head, Ministry of Agriculture

15:05 - 16:00 Roundtable Discussion: The New Producer Protection Package Comes Into Force From January: Non-Payment Penalties, Compulsory Risk-Sharing, Contract Grower Cooperation, Occupational Disqualification - What Can Farmers and Buyers Expect?

Conversation participants:

Tamás Andréka, Department head, Ministry of Agriculture

Ferenc Apáti, President, FruitVeB

Tibor András Cseh, Professional Secretary, MAGOSZ

Attila Csorbai, Chairman, Baromfi Termék Tanács

Csaba Smied, CFO, Alföld Agricultural Cooperative

16:00 - 16:05 Closing Remarks
