

Portfolio Private Health Forum 2020 program

The conference will be held online, we will broadcast the entire program into a online platform with the help of a professional camera crew and audio/video expert team for the best online participation experience.

Section 1: An extraordinary year for private health care service providers - Beyond the impacts of coronavirus

Coronavirus hit when the local private health care sector had an amazing run. How could the players manage the new situation brought about by the pandemic? How well were they prepared for such a situation and what lessons have they learned? Besides giving answers to these questions we will also put the spotlight on the underlying processes in private health care sector.
