Section I. - Digital banking - International and digital competition of banks

Banks have recognised quickly and in time that everyone needs to get on the digitalisation super-train, but with the diversity of technologies, the volatility of the regulatory environment, and the day-to-day operational tasks to be solved, everyone is going their own way. In the meantime, the digital battle has become international; the stakes are high in this tense situation. Senior bank managers and top experts debate where and how to strengthen positions.
